DETAILED ACTION

Priority

The priority claimed in the preliminary amendment (paper no. 5, received 5/17/02) needs to be amended. The recitation set forth currently is inaccurate. Instead of the following recitation, "This application is a 371 of PCT/DK00/00522, filed September 20, 2000, published in English, which is a non-provisional of 60/161,938, filed October 28, 1999", it appears that the following -- This application is the national stage of PCT/DK00/00522, filed September 20,2000, published in English, which claims benefit of US provisional application no. 60/161,938, filed October 28,1999 -- would be more accurate. Correction is necessary.

35 USC 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 12 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is confusing. It is suggested that Applicant use standard Markush claim language. Also, it appears that the following anti-auxin compounds have been misspelled: page 30, line16 "—naphtalene", page 30, line 24 "dichlorophenoxyactic" and page 30, line 28 "naptalam". It appears that these same compounds have been

spelled similarly in the specification on page 8, lines 24-32 and page 9, line 1.

Correction and/or clarification are necessary.

Claim 36 is indefinite because it depends on cancelled claims 34 and 35.

Claim Rejections - 35 USC § 102/103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a), which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 33 and 36 are rejected under 35 U.S.C. 102(b) as anticipated by, or, in the alternative, under 35 U.S.C. 103(a) as obvious over Becwar et al. Claim 33 is drawn to a conifer embryo having a water content less that 70%. Becwar et al disclose the preparation of pine somatic embryos "for germination by a maturation drying treatment which reduced their water content by an average of about 50%" (column 19, lines 63-67). The disclosed pine embryos of Becwar et al appear to meet the limits of

Art Unit: 1661

claim 33. Thus, the claimed invention is clearly prima facie obvious over, if not anticipated by, the prior art.

Claim 36 states a conifer plant produced from an embryo. Becwar et al teach the production of "328.... vigorously growing somatic embryo plants" (column 21, lines 45-46) by somatic embryogenesis. The claimed plant appears to be the same as the plants produced by Becwar et al. Thus, the claimed invention is clearly prima facie obvious over, if not anticipated by, the prior art. The courts have approved the use of 102/103 rejections for product-by-process claims. See MPEP 2113.

Kebebew et al is cited but not applied in any rejection herein and is made of record to exemplify the closest prior art known to the examiner similar to the Applicant's method. However, since Kebebew et al teach somatic embryogenesis of tef, *Eragrostis tef*, there is no reasonable expectation to use this method in conifers.

Conclusion

Claims 1-10,14-22, 27, 28, 31, 32, 38 and 39 are allowed.
